Hello Santhini and David,

Santhini asked us to share with you the tech edited documents. The overview document has a few track changes and comments but could be cleaned up fairly quickly. The main document has a number of comments and there are references that need to be added to HERO. The reference management and other comments would need to be addressed prior to sending up the chain.

The appendices have not been tech edited, and as I recall, were needing a lot of editing and formatting.

Finally, the document includes literature updated through fall 2016 with some 2017 references included as we became aware of the them. We have a literature search update that covers 2017 to early 2018 that needs to be screened and any PECO relevant papers incorporated.

Keep us informed please as events develop.

Thank you, Barbara and Andrew
